

Small Business. Big **Technology.**

**We handle the tech.
You handle the business.**

Most local businesses are losing thousands of dollars a month because their website is outdated, they miss phone calls while on the job, or they are paying for 10 different expensive software subscriptions. eThanda Technologies partners with local businesses to solve this.

Starting Web Design

The eThanda Difference

Before eThanda

You are up on a ladder or under a sink. A customer calls, but you can't answer. They call the next guy on Google and you lose a \$500 job.

After eThanda

You miss a call. Our system instantly texts the customer: "Sorry we missed you! How can we help?" They text back, and you secure the lead.

Before eThanda

Your website was built in 2012. It looks bad on mobile, loads slowly, and Google hides it from local search results.

After eThanda

You have a gorgeous, blazing-fast website with a "Text Us" button. It ranks on Google and turns local traffic into paying customers.

Before eThanda

You pay monthly for Mailchimp, Calendly, QuickBooks, Square, and a CRM, but none of them talk to each other.

After eThanda

We consolidate your software, saving you hundreds a month, and automate your workflow so everything runs smoothly.
